Port Harcourt, Nigeria | Open to Remote, Hybrid & On-site | GMT+1 | +234-702-664-6989 | iwuanyanwuaugustine@gmail.com | Portfolio: <https://codewithdozie.netlify.app>

PROFESSIONAL SUMMARY

Senior Laravel Developer and Full Stack Developer with strong backend specialization in PHP, RESTful API design, fintech systems, mobile app integrations, and ecommerce platforms. Experienced in building secure transaction workflows, wallet and savings products, KYC flows, payment integrations, MySQL-backed applications, and production deployments. Known for translating product requirements into clean API contracts, Postman documentation, and scalable systems that mobile and web teams can integrate quickly.

CORE COMPETENCIES

Backend & Architecture: PHP 8.1+, Laravel MVC, RESTful APIs, API documentation, authentication, service integrations, third-party API integrations, secure transaction workflows

Fintech & Payments: Wallet systems, KYC verification, bill payments, escrow, savings products, crypto-to-fiat flows, ledger-aware transaction flows, payment gateway integrations

Frontend & Web: JavaScript, TypeScript, React.js, Next.js (SSR & Routing), HTML5, CSS3

Mobile: React Native, mobile API handoff, request/response contract design

Database: MySQL, query optimization, complex reporting queries, relational data modeling

Cloud & DevOps: VPS deployment, hosting environments, server configuration, Git, GitHub, CI/CD basics, Postman

PROFESSIONAL EXPERIENCE

Rick Development Limited

Senior Laravel Developer (Full-time, Remote) | Jan 2026 - Jun 2026

Projects: Billway, Bitmonie, Xaddie, AfricanBuyer (Web & Mobile App) | API documentation samples available on request

- Served as full-time Senior Laravel Developer building Laravel/PHP backend systems and REST APIs across fintech, wallet, savings, crypto, bill payment, ecommerce, and real estate products.
- Delivered mobile and web API handoffs across 280+ documented endpoints for Billway, Bitmonie, Xaddie, and AfricanBuyer, including request payloads, authentication rules, example responses, and integration notes.
- Built Billway APIs for authentication, wallet activity, KYC tier upgrades, rotating savings Circles, Ajo/Njangi ROSCA groups, Vault savings, P2P Escrow, payout previews, release confirmations, and transaction status tracking.
- Worked on Bitmonie mobile APIs for buy/sell ramp flows, USD wallet features, referral wallet, crypto loans, USDT EasyEarn, saved beneficiaries, AutoSave, transaction receipts, statement export, and unified transaction history.
- Engineered Xaddie API modules covering wallet engine, P2P and FX transfers, withdrawals, local/global bill payments, direct top-up, gift cards, payment links, notifications, admin operations, AML checks, and reversals.
- Developed AfricanBuyer web and mobile APIs for auth, PIN login, KYC, Finova wallet provisioning, wallet balance sync, bank lookup, transfers, bill payments, subscriptions, RMB/debt, Save4Rent, and land banking workflows.
- Collaborated with mobile/web engineers to define integration behavior and supported VPS deployments, backend maintenance, database work, and production readiness for Laravel/MySQL services.

Webcapz Technologies

Full Stack Web Developer & Lead Instructor | 2023 - Present

- Led full-stack development of web applications using React, PHP, Laravel, and MySQL.
- Managed VPS deployments, hosting environments, and live production systems.
- Enforced Git version control standards and practical development workflows.
- Trained and mentored 50+ students in modern web and mobile development technologies.

Veritas Automobile Ltd.

Full Stack Web Developer | 2025 - Present

- Architected and deployed an Inventory Management System using Laravel MVC, PHP, and MySQL.
- Optimized complex MySQL queries to improve reporting speed and operational visibility.
- Managed backend logic, API integration, and deployment processes.

CHUBI

Frontend / Mobile Developer (Contract) | 2024 - 2025

- Developed a mobile application using React Native connected to secure Laravel APIs.
- Built and deployed a Next.js landing page to enhance performance and SEO.
- Implemented real-time features including crypto rate tracking for BTC/USDT to NGN.
- Optimized state management and overall application performance.

Aloux Engineering Ltd.

Frontend Developer | 2023 - 2024

- Developed and maintained responsive web interfaces using modern frontend technologies.
- Integrated frontend components with backend APIs for seamless data flow.
- Improved UI performance and cross-device compatibility.

SELECTED PROJECTS

Rick Development Fintech API Portfolio

Built and documented Laravel APIs across Billway, Bitmonie, Xaddie, and AfricanBuyer for wallets, KYC, transfers, bills, savings, escrow, crypto ramp, subscriptions, real estate, and mobile/web app integrations.

AtomPay - Personal Project | atompay.com.ng

Built a Laravel and React.js bill payment platform for instant crypto-to-naira conversion using the Breet API, cheap data and airtime purchase, cable subscription, bet funding, virtual number purchase, and social media followers/likes services.

WakaEvent - Client Project | wakaevent.com

Developed a Jiji-style ecommerce/classifieds platform using Laravel and PHP, supporting product listings, seller/customer workflows, and marketplace-style browsing.

RoyalThreeFarm - Client Project | royalthreefarm.com

Built a foodstuff ecommerce store with PHP and JavaScript, including product presentation, customer ordering flows, and store-facing web functionality.

Inventory Management System

Built with Laravel MVC, PHP, and MySQL; deployed to production with optimized database performance and reporting workflows.

CHUBI Landing Page and Mobile App

Designed and developed a Next.js landing page for performance and SEO, with React Native mobile features connected to secure Laravel APIs.

EDUCATION & CERTIFICATIONS

React Native & Mobile App Development - Webcapz Technologies (2025)

Full Stack Web Development - Integral Computer Institute (2016 - 2017)

B.Sc. Industrial Chemistry - University of Port Harcourt (2014 - 2018)
